**Bringing a Piece of NYC History into Today's Digital World**

In this course, you will study history and culture and think about the ways technology can be used to present your findings. Reading about and examining materials related to New York City of the 1920s, you will consider what archival objects teach us about the period, especially in the contexts of race, ethnicity, gender, sexuality, and immigration. Your readings, films, discussions, and group projects will build toward a final project, where you will find an object in an archive, study it, and create a webpage that showcases the object and explains its historical significance. (This kind of work is often called "Digital Humanities.") Although the object in question must relate to 1920s New York, it could be nearly anything: a recipe, an architectural blueprint, a cartoon, a financial report, an article about a sporting event, etc. In this way, you will bring your own interdisciplinary interests into the course.

This is a Blended class which includes both in-person meetings and asynchronous online classwork. Please check with your instructor for the specific days that the class meets in person.
