How much does literature seem to convey the world around you? Have you been able to lift your eyes from the pages of a short story and to see that fictional world unfold before you? Have you read non-realistic fiction that makes the connection between life and literature obvious? This course will present a new way of reading literature by tying short stories to current events and social concerns. We will begin with the film Big Fish, which explores the power of storytelling and its relevance to our everyday lives. Subsequently, every week, you will read one short story published in the U.S. and abroad, and you will be asked to link it to social, political, technological, environmental, or scientific events through recent articles and podcasts. In conjunction with analyzing short stories, class discussions will relate to "adjustment to college life"; although these discussions may or may not stem from weekly readings, they should assist you in fostering a campus community and in discovering resources when adjusting to college life.

Short Stories, Podcasts, and News Articles: Merging What We do With What We Read
